NORWOOD NURSERIES.

FREDERIC J. REA,

508 Pleasant Street, Norwood, Mass.

TELEPHONE CONNECTION.

NOTICE TO CUSTOMERS.

I shall be pleased to see visitors at the Nurseries, and shall arrange to be there on Monday of each week, or if preferred, appointments may be made by letter or telephone.

The nearest railroad station is Norwood Central (about fifteen minutes' walk) on the Midland Division of the N. Y., N. H. & H. R. R. Electric cars can be taken from Forest Hills to Dean St., Norwood—one hour's ride.

Customers are requested to state whether they wish their plants sent by **mail, express or freight.**

To avoid mistakes or delays, please see that name and full address are plainly given.

EVERY CARE is taken in packing so as to ensure the arrival of plants in good condition, but I cannot be held responsible for any loss or damage through delay, or any other cause during transit.

If plants are not satisfactory, or there are any mistakes, please notify me **immediately.**

COMPLAINTS cannot be entertained unless made within ten days after receipt of plants.

My stock is free from all diseases, and has been officially inspected.

Certificate of inspection accompanies each shipment.

A FEW REMARKS CONCERNING OLD FASHIONED PLANTS.

The popularity of these Old Fashioned Garden Plants is becoming more marked every year, and deservedly so.

There is not an ornamental plant grown that can compare with these in attractiveness, beauty and usefulness, and there seems to be always something new and different every day to admire in a garden of these plants.

Among the most popular and well known varieties are Coreopsis, Larkspurs, Bell-Flowers, Poppies, Iris, Hollyhocks, Phloxes, etc.

These plants require comparatively little care when once they are planted, as they come up and flower successively year after year.

In planting an Herbaceous Perennial Garden it is always advisable to make a rough plan so that you can tell the best place to plant everything you wish to put in, and what is of very great importance, it will help to keep the colors properly blended, and also help to arrange them with better effect regarding their flowering season.

This time of flowering must not be lost sight of if you wish to avoid clashing of colors, and in this catalogue you will find the month of flowering given, as well as the color.

If a little thought is given in choosing varieties a continuous display may be had from April till October.

Always plant, as far as it is possible, in masses, as this is the most natural way and also the most effective.

Nearly all species that are found wild are in masses. It is more satisfactory in most instances to plant a limited number of varieties in masses, than to fill up your space with single plants in more variety.

Always cut off the flower stems as soon as flowers have gone by, as the garden will look better and the individual plants be greatly benefited, and in some cases a second period of bloom will result.

Novelties and Other

Especially Desirable Plants.

ARABIS ALPINA PLENA.

	Each.	Dozen.
A double form of the well-known Rock Cress, covered with pure white double flowers, in spikes 4 to 6 inches in height. May.	\$.15	\$1.50

ARENARIA MONTANA—(Mountain Sandwort.)

Masses of dark green foliage, covered with white flowers in early summer. Fine for rockery or border. Height 4-6 inches.	.25	2.50
--	-----	------

AQUILEGIA FLABELLATA NANA ALBA.

A very handsome short-spurred variety of the Columbine family, native of Japan, with white flowers, and only 1½ feet in height. June.	.25	2.50
---	-----	------

ARRHENATERUM BULBOSUM VARIEGATUM.

A very pretty ornamental grass, with variegated silvery foliage, growing to a height of 6 to 12 inches. Very fine for edging or massing. Awarded a First-class Certificate of Merit.	.25	2.50
--	-----	------

ASTER ALPINUS.

A hardy Alpine Aster, flowering in May and June, with large bluish purple flowers. As this variety grows to be only about 1 foot high, it is very useful for bordering and rockery work.	.20	2.00
--	-----	------

ASTER ESME.

This is one of the handsomest fall white Asters in cultivation. It is rather dwarf, with masses of large, pure white flowers, which retain their beauty for a long time. The centres are yellow, gradually turning to black, which makes a very effective contrast. Height, 2 feet. September.	.25	2.50
--	-----	------

ASTER MADONNA.

	Each.	Dozen.
Another very fine variety of the fall blooming Aster, with tall, pyramidal spikes of large, white flowers. September. 3 feet.	\$.25	\$2.50

ASTER NOVÆ ANGLIÆ—"WILLIAM RAYNOR."

A form of the New England Aster. with bright magenta flowers. Very handsome, large and attractive. September. Height, 4 feet.	.35	3.50
---	-----	------

CAMPANULA CARPATICA—"RIVERSLEA"—New.

This is a novelty of very great merit. It received a unanimous Award of Merit from the Royal Horticultural Society of England, 1901. In habit it differs from C. Carpatica type, being stronger and larger in every way. The clear porcelain-blue flowers are three inches across, (about same size as those of the Platycodons). It is probably a natural hybrid. Height, 6-8 inches. June.	.35	3.50
--	-----	------

CAMPANULA PERSICIFOLIA GRANDIFLORA—Rea's Variety.

Awarded a First-class Certificate of Merit by the Massachusetts Horticultural Society, 1900. A very handsome variety with tall spikes of large clear purple blue flowers. Superior in every way to forms usually sent under this name. Height, 2-3 feet. June.	.25	2.50
--	-----	------

CAMPANULA PERSICIFOLIA GRANDIFLORA PLENA.

A very fine, selected, double form of the above, but more dwarf. Height 1½-2 feet. June.	.35	3.50
--	-----	------

CAMPANULA PERSICIFOLIA ALBA GRANDIFLORA GIGANTEA FL. PL. (MOERHEIMII)—New.

The most beautiful of all the peach-leaved Campanulas, for which I was awarded a Silver Medal by the Massachusetts Horticultural Society. It is very strong growing and has extra large flowers, borne on erect, sturdy stems, in close spikes. The flowers are pure white, three inches across, well open. The several rows of petals are arranged alternately, giving a flower that, although large and double, is yet light and dainty. Height, 2-3 feet. June.	.35	3.50
--	-----	------

===== *READ THE NEW* =====

AMERICAN GARDENING

It is just the paper you need to keep you posted on everything new in the line of new fruits, trees, plants and general horticultural and gardening matters.

It is practical, interesting and instructive on all matters pertaining to this subject and its several departments contain information that must be of valuable use to you.

It contains sixteen pages, numerous half-tone illustrations, and is issued once a week—fifty-two copies per year. There is no other paper like it. Can you afford to do without it?

From some of the information gleaned from its pages you will probably save many times the subscription price. Fill up this subscription blank at once and mail it with check or post office money order to:

CAMPANULA URTICIFOLIA ALBA PLENA—New.

Each.

Dozen.

The Double Nettle-leaved Harebell. Erect, branching spikes of double, pure white flowers. Very handsome. Height, 1½-2 feet. July.

\$.50

\$5.00

HARDY CHRYSANTHEMUMS.

These, within the last few years, have become very popular, as they come into bloom about the last of September, and continue in beauty throughout October. They are very showy and useful for cutting purposes. The following are among the most distinct varieties:

Ada—Small yellow, bronze centre, pompon.

Agalia—Large lemon yellow.

Blushing Beauty—White, edged with pink.

Eagle d'Or—Large yellow, pompon.

Excelsior—Large bright yellow.

Golden Fleece—Deep golden yellow.

Ivanhoe—Pink.

Marconi—Large pure white.

Pet—Pink and white, pompon.

Prosperity—Pure white pompon.

Rhoda—Very pale pink.

Santiago—Bronze, tipped yellow.

St. Crousse—Deep brick red.

Tisro—Large deep pink.

Ready May 1st, from 2½ inch pots.

.15

1.50

ERIGERON AURANTIACUS—Double Orange Daisy.

A very pretty species, with bright orange, composite flowers, 2 inches in diameter. Height, 1 foot. July.

.25

2.50

HELENIUM PUMILUM MAGNIFICUM.

A handsome new variety, being a cross between H. pumilum and H. autumnale superbum. It grows 2½ feet high, having an abundance of large yellow flowers, and blooming nearly all through the summer.

.35

3.50

HELLEBORUS NIGER—Christmas Rose.

Large pure white, single flowers about Christmas time, but the plants should be protected by a frame to ensure their flowering at that time.

.25

2.50

HEMEROCALLIS FLAMID.

This is a new variety of the Day Lily, with clear orange yellow flowers, sweet-scented, and growing about 2½ feet high. June.

Each.	Dozen.
\$.35	\$3.50

IRIS GERMANICA.

It is hardly necessary to describe this well-known family of *Fleur-de-lis*. On account of the richness and beauty of the flowers they are sometimes called Hardy Orchids. In height they vary from 2 to 3 feet, blooming in June. The list here given comprises the best varieties to be had. In the descriptions S.—standards, or three upright petals, and F.—falls, or three drooping petals.

I was awarded a First-class Certificate of Merit by the Massachusetts Horticultural Society for a collection of these Iris.

Darius —S. light yellow; F. brown, veined white.	\$.25	\$2.50
Delicata —S. very pale yellow; F. pale rosy purple.	.25	2.50
Gracchus —S. light yellow; F. crimson, veined white.	.35	3.50
Honorabilis —S. golden yellow; F. yellow and bronze.	.15	1.50
H. Cramer —S. and F. delicate pale lavender; F. darker.	.15	1.50
Mme. Chereau —S. and F. white, fringed with pale violet.	.20	2.00
Maori King —S. golden yellow; F. rich brown.	.25	2.50
Mrs. Horace Darwin —S. snow white; F. white, slightly veined purple.	.35	3.50
Mme. Paquette —S. and F. rosy lilac; F. deeper.	.35	3.50
Pallida Dalmatica —S. lavender; F. lavender, tinted rose.	.50	5.00
Pallida Mandraliscae —S. and F. rich lavender purple.	.50	5.00
Queen of May —S. and F. delicate soft lilac, slightly tinted pink.	.25	2.50
Spectabilis —S. and F. deep, rich violet purple.	.25	2.50
Victorine —S. pure white, blotched with purple. F. deep purple, veined white.	.35	3.50

IRIS GERMANICA—"HER MAJESTY."

This is a handsome rosy purple variety, having more of the pink shade than any other Iris. The falls are somewhat darker.

\$1.00 each

LYCHNIS DIURNA RUBRA PLENA.

This is the true old-fashioned Ragged Robin which is now getting to be quite rare. Rather large, coarse foliage, with spikes of showy double crimson flowers, blooming about the end of May. Height, 8-12 inches.

\$.25 \$2.50

LYCHNIS FLOS-CUCULI ALBA PLENA.

	Each.	Dozen.
Double White Cuckoo Flower. Tufts of light green foliage, upright branched flower stems producing numerous pure white feathery flowers from early summer to late fall. Height, 12-18 inches.	\$.25	\$ 2.50

CENOTHERA SPECIOSA ROSEA—New.

A very rare and handsome variety of the Evening Primrose, with large, showy, deep pink flowers. It is almost a continuous bloomer from May till September, and has rather a low, spreading habit. 2 1/2 inch pots.	.35	3.50
--	-----	------

PÆONY—"FESTIVA MAXIMA."

A very rare and handsome variety, with large, extra double white flowers, splashed with carmine. 2-3 feet. June.	.75	7.50
--	-----	------

PAPAVER ORIENTALE—"SILVER QUEEN"—New.

A very distinct, rather low-growing variety of the Oriental Poppy, with silvery flowers slightly tinged with blush, and without the dark blotch so common to most Poppies. June. 2 1/2 inch pots.	.35	3.50
---	-----	------

PHLOX SUBULATA—"VIVID."

A very pretty variety of Moss Pink, with clear salmon pink flowers. May. Height, 4-6 inches.	.35	3.50
--	-----	------

SILENE SCHAFTA—Catchfly.

This is especially desirable on account of its being a dwarf perennial, and flowering late in the season, from July to October. It has rosy pink flowers, borne in great profusion. Height, 6 inches.	.20	2.00
---	-----	------

STOKESIA CYANEA—Cornflower Aster.

Handsome, large purplish blue flowers, 3 to 4 inches in diameter, and borne on stems about 2 feet high. 2 1/2 inch pots. August.	.15	1.50
--	-----	------

TRITOMA PFITZERI—(Kniphofia.)

This is undoubtedly the best of all the everblooming Flame Flowers. The flower heads are 8 to 12 inches long, orange scarlet, and are borne on spikes 3 to 4 feet high. Broad, grass-like foliage. Summer flowering.	.25	2.50
--	-----	------

PHLOX DECUSSATA.

HARDY PERENNIAL PHLOX.

These I consider my leading specialty; for a collection of them I was awarded a bronze medal at the Pan-American Exposition.

Phloxes are old-fashioned favorites which are becoming more popular every year. As they are one of the few flowers that bloom during the hottest part of the summer and continue in bloom through the fall, it can truly be said that no garden is complete without them.

Great improvements have been made in this flower during the last few years. The size of flower and spike is much larger, and the colors now range in nearly all shades except yellow.

The collection here offered contains the best and choicest varieties to be had.

TALL. 2 1-2 to 3 FEET.

	Each.	Dozen.
These colors are taken from the American Florists' Color Chart. Although some of the descriptions are similar, there is a distinction which is very difficult to describe.		
The best and most distinct varieties are marked thus*:		
Alhambra—Light magenta, large white centre.		
*Amphitryon—Lilac suffused with white, large flower.		
Astier-Rehu—Bright, deep purple, half of each petal lighter shade.		
Bacchante—Dark purple magenta, streaked white, darker centre, good size flower.		
Brantome—Light crimson.		
*Chas. Darwin—Bright salmon pink, crimson centre, very large pyramidal spike.	\$.35	\$3.50
*Coquelicot—Bright orange scarlet, dark crimson centre.		
*Crepuscle—Very large flower, lilac, shaded lighter toward margin, very large crimson centre. 2½ inch pots.		
Derviche—Lilac, suffused with magenta and white, large, deep magenta centre.		
Deliverance—Deep rose pink, bright crimson eye, large spike. 2½ inch pots.		

	Each.	Dozen.
Etna —Bright red, tinted salmon, dark crimson centre.	\$.25	\$2.50
Etoile —Bright magenta, shading to white centre.		
*Fernand Cortez —Bright deep crimson, very dark centre, bronzy effect.	.25	2.50
*Fiancee —Pure white, very large. 2½ inch pots.		
*Flambeau —Bright salmon red.	.35	3.50
Girondin —Dark magenta, large flower.		
Hofgärtner Starke —Bright deep purple, maroon centre.		
*Huxley —Purple magenta, very large, distinct white centre.		
Laniboire —Bright rose, slightly shaded scarlet, crimson centre.		
*Le Cygne —Pure white, large flower, very large pyramidal spike.	.25	2.50
*Le Mahdi —Very bright deep purple, velvety appearance, large spike.	.25	2.50
*Lord Rayleigh —Dark violet, purple centre, blue effect.		
*Lumineux —Pure light red, shaded lighter toward centre, bright crimson eye, very large flower.		
*Mars-Le-Tour —Large flower, clear pink, almost half of each petal white.		
Meteore —Rose, white centre.		
*Montagnard .—Bright dark crimson, dark centre, large fine spike.	.25	2.50
M. Wiss —Dark crimson, shaded purple, large flower, velvety appearance.	.25	2.50
*Pink Beauty —Pale pink, enormous spike.	.35	3.50
*Rayonnant —Crimson, half of each petal white, dark centre, well formed spike.		
*R. P. Struthers —Light crimson pink, slightly tinted orange, distinct dark centre, very fine.		
Richepin —Pure white, very large crimson centre, covering nearly half the flower. 2½ inch pots.	.25	2.50
William Ramsay —Deep purple magenta, darker centre, bright velvety appearance.	.25	2.50
William Muhle —Pure pink, crimson centre.		
All the above varieties 20 cents each, \$2.00 a dozen, except where noted.		

DWARF. 18 INCHES to 2 FEET.

Albatre —Pure white, large flower.		
Argon —Pale magenta lilac, crimson pink centre. 2½ inch pots.		
*Atala —Clear dark pink, light centre.	.25	2.50

	Each.	Dozen.
* Candeur —Pure white, very dwarf, good-sized flower and spike.		
Colibri —White, suffused with magenta lilac, bright, large magenta centre.		
Dolly —Pale pink, lighter eye. 2½ inch pots.		
E. Danzervilliers —Lilac, shading to white centre.		
* Esperance —Large flower, magenta lilac shaded to white centre, one of the best.		
* Evenement —Bright soft pink, tinted salmon, blue-purple eye.	\$.25	\$2.50
* Fedora —Large flower, white, suffused with light crimson, shading to crimson centre.	.35	3.50
Japonais —Pink, light centre.		
Suffrage —Light magenta, crimson centre.		
* Thebaide —Bright salmon pink, crimson centre, very dwarf, spreading habit.		
All above varieties 20 cents each, \$2.00 a dozen, except where noted.		

OLDER VARIETIES.

Aurora Borealis —Good-sized flower and spike, light crimson, dark centre.		
Beranger —Blush, shaded to pink. 2½ inch pots.		
Bicolor —Light pink, tinted salmon, large crimson centre.		
* Coccinea —Deep, bright red, small flower, but a very large spike, 2½ inch pots.	.25	2.50
Commonwealth —Dark crimson centre, shading to almost white on edges of petals, very tall spike.		
Cross of Honor —Each petal lilac with wide margins of white.		
Czarina —Pure white, very large pyramidal spike.		
Dedham —Blush white, dark crimson centre.		
Eclairneur —Large flower, deep magenta.		
* Gen. Chanzy —Scarlet pink, tinted salmon, very fine spike,	.20	2.00
Greville —Crimson, dark centre, each petal margined with white.		
Henry Murger —Large, white flowers, very large crimson centre. 2½ inch pots.		
* Independence —Pure white, large flower and spike.		
* Iris —Deep purple magenta, dark crimson centre, very large spike.		
Ixion —White, slightly suffused with crimson, crimson centre, very fine large spike.		

	Each.	Dozen.
* James Bennett —Light pink, tinted salmon, large crimson centre.	\$ 20	\$ 2.00
James Galloway —Bright crimson, maroon centre.		
Le Feu Du Monde —Bright reddish pink, dark centre.		
* Le Soleil —Bright crimson pink, shaded lighter toward centre.		
Le Vaughan —Pale magenta lilac, pink centre.		
Matador —Similar to General Chanzy, smaller flowers, but larger spike.	.20	2.00
* Mme. Meuret —Similar to Le Feu du Monde, earlier flowering.		
* Mme. P. Langier —Bright pink, shaded salmon, crimson centre, fine spike.	.20	2.00
Mrs. Dwyer —Pure white, very large, distinct crimson centre, tall, large spike.		
Norwood —Crimson, dark centre.		
Oracle —Pale magenta lilac, crimson centre.		
* Ornament —Light crimson, very bright.		
Pantheon —Large flower, light crimson.		
* Saisons Lierval —Pure white, distinct crimson eye, very fine.		
Statesman —Very large spike, magenta, dark crimson centre.		
All of the above varieties 15 cents each, \$1.50 a dozen, except where noted.		

PHLOX DECUSSATA—"BRUNETTE."

This is a new Phlox, of a bright, rich, cardinal red shade.

It is very handsome, with a very large flower and spike, and is one of the darkest reds yet introduced.

From 2 1/2 inch pots. .50

PHLOX DECUSSATA—"DAWN."

Another new variety, of a delicate shade of pale pink. Good-

sized flower and spike. From 2 1/2 inch pots. .35

PHLOX DECUSSATA—"VENUS."

This is a very desirable variety, with tall spikes of beauti-

ful salmon-pink flowers. From 2 1/2 inch pots. .35

PHLOX SUFFRUTICOSA.

	Each.	Dozen.
Early Flowering Phlox, similar to Phlox decussata, but coming into flower in June and lasting through the summer. The foliage is long and narrow and the spikes 1 to 2 feet in height. The following varieties are among the best grown.		
Burns —Rosy purple.	\$.20	\$2.00
Beauty of Mindon —White ground, flushed with deep rose.	.15	1.50
Miss Lingard —Large spikes of white, suffused with pink.	.15	1.50
Modesty —Large flowers, lilac pink.	.15	1.50
Progress —White, suffused with lilac.	.15	1.50

PHLOX SUFFRUTICOSA—"MONT BLANC."

A new and very fine pure white variety.	.35	3.50
---	-----	------

Certificate of Inspection Accompanies Each Shipment.

Epimedium						
alpinum	Barren-wort	A low growing plant with pretty foliage, and spikes of reddish-brown flowers	6-9 in.	May	20	2 00

Botanical Name.	Common Name.	Color, Etc.	Height.	Sea.	Price.	
					Ea.	Doz.
Erigeron					Cts.	Dol.
aurantiacus	Double Orange Daisy	See page 7				
purpureum	Fleabane	Small rosy purple daisy-like flowers in great profusion	12-18 in.	June	10	1 00
speciosum superbum	"	Violet blue, somewhat similar to a hardy aster	1-2 ft.	July	20	2 00
Eryngium						
amethystinum	Sea Holly	Shiny dark green foliage, metallic blue flower, heads and stems thistle-like	2-3 ft.	"	25	2 50
Eulalia						
gracillima univittata	Ornamental Grass	Tall green foliage with feathery plumes, lasting in beauty through the winter, if cut early	4-5 ft.	Oct.	20	2 00
japonica variegata	Ornamental Grass	Similar to preceding, with variegated leaf	4-5 ft.	Oct.	20	2 00
japonica zebrina	Zebra Grass	Similar to preceding, with leaf striped laterally	4-5 ft.	"	20	2 00
Euphorbia						
corrollata	Flowering Spurge	Small pure white flowers in abundance; good for cutting	1-2 ft.	July	10	1 00
Funkia						
ovata	Plantain Lily	Ornamental foliage, spikes of bluish flowers	1-2 ft.	June	15	1 50
subcordata	"	Yellowish green foliage, pure white flowers; good for cutting	1-2 ft.	July	15	1 50
undulata picta	"	Foliage variegated with white	1-2 ft.	"	15	1 50
Gaillardia						
grandiflora	Blanket Flower	Composite flowers, variegated with shades of red and yellow	2-3 ft.	"	15	1 50
Galium						
boreale	Bedstraw	Very small, fine, white flowers; good for cutting	2-3 ft.	"	15	1 50
Geranium						
ibericum	Cranesbill	Showy violet blue flowers, 1 inch in diameter	12-18 in.	"	15	1 50
sanguineum	"	Very pretty cut-leaved variety, with spikes of reddish purple flowers	8-12 in.	July & Aug.	20	2 00
" album	"	A pure white form of above. Good for cutting	8-12 in.	July & Aug.	15	1 50
Gillenia						
trifoliata	Bowman's root	Long spikes of small white flowers tinged with pink; good for cutting	2-3 ft.	"	20	2 00
Gypsophila						
acutifolia	Baby's Breath	Numerous small white flowers tinged with pink	3-4 ft.	Aug.	15	1 50

Botanical Name.	Common Name.	Color, Etc.	Height.	Sea.	Price	
					Ea.	Doz.
Gypsophila					Cts.	Dol.
paniculata	Baby's Breath	A mass of very small, fine white flowers; the best of the four	2-3 ft.	July	15	1 50
repens	"	A pretty trailing form, white, tinged pink; good for rockery	4 in.	June	15	1 50
Helenium						
autumnale	Sneezewort	Loose rounded heads of bright yellow flowers	6-7 ft.	Aug.	15	1 50
superbum	"	Flower-heads smaller than preceding and with dark brown centre	1-3 ft.	June	15	1 50
Bolanderii	"	Similar to H. autumnale, flowers striped and splashed with red	3-4 ft.	Aug.	15	1 50
grandicephalum	"	A pretty golden yellow form	1-2 ft.	July	25	2 50
striatum	"					
pumilum	"					
" magnificum	"	See page 7				
Helianthus						
decapetalous	Sunflower	Masses of bright yellow flowers	4-5 ft.	Aug.	15	1 50
giganteus	"	Long, narrow foliage and multitudes of pale yellow flowers	8-10 ft.	"	15	1 50
Maximiliani	"	Deep golden yellow, dark centre	6-8 ft.	"	15	1 50
superba	"	Larger flowers, lemon yellow; silvery, downy foliage	3-4 ft.	"	15	1 50
mollis	"					
multiflorus	Double	Double deep yellow, similar to a cactus dahlia	3-4 ft.	July	15	1 50
plenus	Sunflower	Long narrow, graceful foliage; pale yellow flowers	8-10 ft.	Sept.	25	2 50
orgyalis	Sunflower					
Heliopsis						
lævis		Similar to the sunflower, but more continual bloomer; golden yellow	4-5 ft.	Aug.	10	1 00
Helleborus						
niger	Christmas Rose	See page 7				
Hemerocallis						
disticha	Day Lily	Long narrow foliage, large double terra-cotta flowers	3 ft.	Aug.	25	2 50
plena	"	Orange flowers, tinged brown	1-2 ft.	June	15	1 50
Dumortierii	"	Pale yellow; fragrant	2-3 ft.	"	15	1 50
flava	"	See page 8				
flamid	"	Grassy foliage and clear yellow flowers	1-2 ft.	May	25	2 50
graminifolia	"					
Kwanso fl. pl.	"	Double deep orange, strong grower	3 ft.	Aug.	15	1 50
Thunbergii	"	Bright yellow, very desirable	3-4 ft.	July	25	2 50
Hepatica						
acutiloba	Liverleaf	Pretty anemone-like flowers, ranging from white to bluish-purple	6 in.	April	15	1 50
triloba	Liverleaf	Similar to preceding, with rounded leaves	6 in.	"	15	1 50

Botanical Name.	Common Name.	Color, Etc.	Height.	Sea.	Price.	
					Ea.	Dol.
Heuchera sanguinea	Coral Bells	Spikes of small bright red flowers. 2½ inch pots.	12-18 in.	July	15	1 50
Hibiscus militaris	Marsh Mal-low	Large pale rose flowers, 4 to 5 inches in diameter	3-4 ft.	Aug.	15	1 50
moscheutos	"	Large pink flowers, purple eye, more open than preceding, 6 inches in diameter	3-4 ft.	"	20	2 00
"Crimson Eye"	"	Large pure white flowers with dark crimson eye	3-4 ft.	"	20	2 00
Hollyhock (Althæa rosea)		Showy spikes of double flowers in white, yellow, red and pink, and single mixed	5-7 ft.	July	15	1 50
Allegheny mixed		Double mixed	5-7 ft.	"	10	1 00
		Similar in every way to single varieties, but brighter colors and fringed	5-7 ft.	"	15	1 50
Iberis corifolia	Perennial Candytuft	Dark evergreen foliage, heads of pure white flowers	8-12 in.	May	25	2 50
Iris Cengialti		Standards bright lilac; falls darker, large, rather rare	12-18 in.	"	15	1 50
Florentina	Orris Root	Large, fragrant. bluish-white; very handsome	2-3 ft.	"	25	2 50
Germanica	Fleur-de-lis	See page 8				
Kæmpferi	Japanese Iris	The largest flowered iris of all, in various colors	3-4 ft.	July	15	1 50
pumila	Dwarf Iris	Similar in style of flower to Iris Germanica, in yellow, blue, and white	8-12 in.	May	10	1 00
Siberica	Siberian Iris	Clusters of 4 or 5 dark blue flowers	2-3 ft.	June	15	1 50
" alba	"	White form of preceding	2-3 ft.	"	15	1 50
" orientalis	"	Dark blue form of preceding	1-2 ft.	"	15	1 50
Kniphofia		See Tritoma				
Lathyrus latifolius	Perennial Pea	A pretty climber, similar to the sweet pea, with clusters of red flowers; good for cutting	4-8 ft.	Aug.	25	2 50
" albus	"	A white form of the above	4-8 ft.	"	25	2 50
Lavandula vera	Lavender	A well-known old-fashioned plant, with a delightful fragrance. 2½ inch pots	1-2 ft.	July	15	1 50
Lespedeza Sieboldi (Desmodium)	Bush Clover	Long drooping racemes of rosy purple pea-shaped flowers. Very ornamental	3-4 ft.	Sept.	25	2 50
Liatris pynostacha	Blazing Star	Long spikes of magenta purple flowers	5-6 ft.	"	15	1 50
spicata, var. montana	"	Compact spikes of magenta purple flowers	9-12 in.	"	15	1 50

Botanical Name.	Common Name.	Color, Etc.	Height.	Sea.	Price.

Viola cornuta	Violet	Large blue flowers, dark green foliage; good for cutting	6-9 in.	June	15	1 50
" alba	"	A pure white form of above	6-9 in.	"	15	1 50
pedata	Bird's-foot violet	Large pale blue flowers, yel- low centre	6-12 in.	May	15	1 50
Yucca filamentosa	Adam's Needle	Numerous, creamy-white, bell-shaped flowers, borne on long spikes. Long, sharp-pointed leaves	2-4 ft.	June	20	2 00

ROSES.

DOROTHY PERKINS.

	Each.	Dozen.
Large clusters of double, clear shell pink flowers. The foliage is deep green, and the flowers are of large size and fragrant. A good climbing rose.	\$.35	\$3.50

THE FARQUHAR ROSE.

The best climbing rose since the Dawson and Crimson Rambler were introduced. A strong, vigorous grower, with handsome, glossy foliage, and clusters of large, double, pink flowers, of a very pleasing shade.	.75	
---	-----	--

SOLEIL D'OR. (Golden Sun.)

A new, hardy, yellow rose, with flowers long budded, varying in color from orange-yellow to reddish-gold.	.50	5.00
---	-----	------

DEBUTANTE.

This is a new rose, suitable for either climbing or trailing, with clusters of double, beautiful, soft-pink flowers.	1.00	
--	------	--

SWEETHEART.

Another new rose, with large, bright-pink, double flowers, changing to white when expanded. Good for either climbing or trailing,	1.00	
---	------	--

PERSIAN YELLOW.

A large-growing species, covered with deep golden yellow flowers in June.	.35	
---	-----	--

HYBRID PERPETUAL ROSES.

The following varieties of Hardy Roses are among the best for outdoor planting and cutting purposes:

Alfred Colomb—Carmine crimson; large.

American Beauty—Deep crimson, very fragrant.

Baroness Rothschild—Pale pink.

Coquette des Alps—White, centre shaded pink.

General Jacqueminot—Scarlet crimson.

John Hopper—Bright rose; large.

La France—Beautiful silvery pink.

Margaret Dickson—Pure white.

Prince Camille de Rohan—Velvety crimson; deep.

35 cents each; \$3.50 dozen.

POLYANTHA OR FAIRY ROSES.

These are very profuse bloomers, and well adapted for bedding purposes, as they flower continually all summer, and they will, if lifted, flower all winter as well, making very desirable house plants. These are sometimes called miniature roses, as the flowers are so very small.

They are perfectly hardy, if suitably protected through the winter.

Etoile d'Or—Deep chrome yellow.

Etoile de Mai—Yellow, changing to creamy white; very free bloomer.

Eliza Chatrand—Rose colored flowers, touched with yellow.

George Pernet—Very bright rose.

Marie Pavie—Large clusters of rich creamy white, flushed with carmine.

Mrs. E. A. Nolte—Beautiful shade of chrome yellow.

Miniature—The smallest of all roses, covered with clusters of rose colored flowers.

Perle d'Or—Deep yellow, changing to salmon.

Paquerette—This is very free, with clusters of pure white flowers.

Petite Leonie—Small flower, pure white, centre tinted carmine.

Ready for delivery May 1st, from 2½ inch pots.

15 cents each. \$1.50 dozen.

HARDY CLIMBING ROSES.

	Each.	Dozen.
Crimson Rambler —35 and 50 cents each. \$3.50 and \$5.00 dozen. Extra large bushes, 4-5 feet. .75 each.		
Mutiflora Japonica —Blackberry Rose. Clusters of small pure white flowers, covering the entire plant, and somewhat resembling the flowers of a blackberry; fragrant.	\$.25	\$2.50
Pink Rambler	.35	3.50
Setigera (Prairie Rose) —Single flowers borne in clusters. changing from deep rose to white.	.35	3.50
Yellow Rambler —	.35	3.50

TRAILING WICHURIANA ROSES.

	Each.	Dozen.
For covering rocks, banks, and other bare spots, there is nothing to equal the cemetery rose. They are both single and double, and range in color from white to deep rose, and shades of yellow.	\$.25	\$2.50

ROSA RUBIGINOSA.

This is the well-known Sweet Brier Rose, grown for its sweet-scented foliage.	.35	3.50
---	-----	------

LORD PENZANCE'S HYBRID SWEET BRIERS.

These are hybrids of the Sweet Brier, having the sweet-scented foliage, and colors ranging from white to deep red, and shades of yellow,	.50	5.00
--	-----	------

[ROSA RUGOSA.—(Japanese Rose.)

These are very fine for single specimens, beds and hedges. Very free and continuous flowering. The flowers are large, single, and followed by very large, round berries. Red and white flowered, mixed.	.25	2.50
---	-----	------

CLIMBING VINES.

Ampelopsis Quinquefolia —Common Woodbine.	.15	1.50
Ampelopsis Veitchii —Boston or Japanese Ivy.	.25	2.50
Aristolochia Sipho —Dutchman's Pipe. Large, dark-green foliage. A rapid grower when established.	.50	
Bignonia Radicans —Trumpet Vine.	.25	2.50
Celastrus Scandens —Bitter-sweet.	.25	
Clematis Paniculata —A very strong grower and well adapted, on account of its freedom of flowering and fragrance, for piazzas, etc. Panicles of pure white flowers. 35 and 50 cents each.		
Clematis Jackmanii —Large, rich purple flowers in great profusion.	.50	5.00
Lonicera Hallii —Japan Honeysuckle. Very free and fragrant white and yellow flowers.	.25	2.50
Wistaria Chinensis —Long clusters of violet purple flowers.	.50	
Wistaria Chinensis Alba —A white form of the above.	.50	

RHUS TYPHINA LACINIATA.—(Cut-leaved Staghorn Sumach.)

The ordinary Staghorn Sumach is a plant of perfect hardihood, adapted to all soils, even of dry and barren nature, and producing vigorous growth, with an abundance of broad, compound, soft green foliage, which takes on most brilliant autumnal shades of orange, crimson and yellow. A plant adapted to varied uses, either by itself, in masses, or singly, or grouped with other hardy trees and shrubs. Its native character is not a detriment to its use; in fact, no shrub other than those of its immediate family combine that perfect hardihood with rich, sub-tropic effects in the same manner as do sumachs.

The above description is equally true of the cut-leaved form of the Staghorn Sumach, but in addition to the inherent valuable characteristics of the type, we have in the cut-leaved form decided advantages and improvement over the type in that the foliage is more deeply compound, giving the actual effect of fern fronds; and when one considers that the shrub is capable of forming a broad bush, spreading ten or twelve feet in diameter, and attaining a height of from eight to fifteen feet, completely clothed with this beautiful cut foliage, one gains an impression as to the ornamental value of the plant. I cannot recommend too highly the cut-leaved Staghorn Sumach. 25 and 50 cents each. \$2.50 and \$5.00 per dozen.

RHODODENDRON MAXIMUM.

The hardiest of all Rhododendrons, growing to a height of 6 to 8 feet. Flowers borne on large trusses, varying in color from white to light pink. They do well in any situation, but are especially adapted to shade and moist places. Flowers borne in July after the hybrid varieties are over.

Each.	Dozen.
\$.50	\$5.00

JAPANESE BLOOD-LEAVED MAPLE.

A low-growing, spreading bush with handsome, very much cut foliage of the deepest blood red, which keeps its color from May till cut off by frost. This is undoubtedly one of the handsomest shrubs grown, and quite hardy.

1.50

SPRUCES.

I have a limited supply of fine, large specimens, ranging in height from 4 to 7 feet. Prices, according to size, on application.

WHITE PINES.

These make very effective groups, and are also excellent for wind-breaks, and for covering land otherwise of no use. They also make good specimen trees for lawns. Those I have to offer are about 2 feet in height. Prices, 25 cents each. \$2.50 a dozen. \$15.00 a hundred.

DAHLIAS.

	Each.	Dozen.
I can supply all the popular kinds of Cactus, Decorative, Pompon and Single Dahlias, at the popular price of	\$.15	\$ 1.50

GROFF'S NEW HYBRID GLADIOLI.

Hybrid Seedlings—The most popular strain in America. Large blooming bulbs 45 cents per dozen, \$3.00 per hundred. Extra fine mixture obtained direct from Mr. Groff's grower including some of Groff's Gold Medal and Silver Trophy Strains. Small bulbs, \$1.25 per 100. A good proportion of these will bloom before frost.

NOTE.—Do not expect Gladioli bulbs to be of uniform size, as some of the choicest varieties never produce large bulbs. I was awarded Cowee's Special Prize for Groff's Hybrid Gladioli at Horticultural Hall, Boston, 1903.

THE PIERSON FERN.—(*Nephrolepis Piersonii*.)

A grand variety of the well known Boston Fern. Owing to the fulness of the fronds, even small plants are well furnished, and are much more symmetrical and beautiful, than are larger plants of the Boston Fern. When fully developed the fronds are broad and exceedingly graceful, measuring fully six inches across. The leaflets of the frond develop into perfect miniature fronds, showing two distinct shades of green. The tips being a light green, while the centre and main part are of a dark rich shade. This variation in coloring is very beautiful and effective. Strong well-rooted plants, 7 inch pots, \$1.50 each.

HARDY ORNAMENTAL SHRUBS.

Botanical Name.	Common Name.	Color, Etc.	Height.	Sea.	Price.	
					Ea.	Doz.
					Cts.	Dol.
Althea						
	Rose of Sharon	Shrubby members of the hollyhock family, with large handsome flowers in white, pink and purple	8-12 ft.	Aug.	25	2 50
Berberis						
Thunbergii	Japan Barberry	Drooping, symmetrical bushes with small yellow flowers and bright green foliage, changing in the fall to crimson, orange, and bronze, with bright red berries	1-2 ft.	May	20	2 00
Calycanthus						
floridus	Strawberry Bush	Reddish-brown, pineapple-scented flowers	3-4 ft.	June	35	2 50
Cornus
